«DENBER Israeli Paints» LTD
г-ну Б. Коган

Dear Mr. Kogan - general manager "Denber Israeli Paints Ltd."

We hereby confirm that in august 1999 we painted in M.M.Z (Moldavsky Metalurgicheskyy Zavod) 1,500 sqm. with your paints: Zink Silicate primer and Aluma Silicon topcoat the factory chimney according their demand for anticorrosive and 540°C durability. The same we did on Tiraspol Transgas 2 chimney.

Also we painted the inner walls near the furnaces 4,000 sqm. with your paints: Zink Silicate primer and Silicone acrylic according their demand for anticorrosive and 200°C durability.

For the exterior areas 6,500 sqm. like walls, pipes and reservoirs, we used your three layers paint system: Zink Silicate primer, Epoxyden Ship 100% as middle layer and Denbergloss UV resistant as topcoat.

In the furnaces we painted 1,000 sqm with your water base Silicton, two layers directly on rust cleaned metal walls for heat resistant demand of 960°C.

The huge field outside the factory, made all of metal construction (many thousand sqm.), we painted with Denberust primer and Topcolour topcoat.

All the the painting works was very successful and standing according your recommendations for the environment demands.

С уважением,

директор фирмы Васильев А.В.
